Speedmaster (£7,599.00) †

PRODUCT INFORMATION

OVERVIEW

Long, low, blacked out and mean, the Speedmaster echoes the hot-rod cruiser theme but adds a very British spin with some classic Triumph parallel twin power.
Built to be an engaging entry level bike that's also ideal for riders moving to their first big bike the Speedmaster has the zest and handling to keep experienced riders happy too.
Everything about it is laid back and easy. The low rider look is a classic one reflecting the style of homebuilt hot-rods on both sides of the Atlantic.
But the soul of any bike is its engine. And that’s where the Speedmaster stands out even more, with an air-cooled twin that is steeped in our long and colourful heritage.
All this means you have a highly capable motorcycle that has a great feel and delivers satisfying performance every single day.
That’s what makes it such good value for money.

ENGINE

Performance

The output peaks at a muscular 61PS and there's strong torque from low in the rev range, with a maximum of 53lb.ft at just 3300rpm. To you that means plenty of thrust at a flick of the wrist without needing to resort to the slick gear change.

Parallel Twin

The Speedmaster's parallel twin is such a refreshing change with its roots in the very engines that brought us to the forefront of motorcycling during the 1950s and 1960s - the golden era of British twins.
Still very much a classic-looking Triumph engine, we have built it using modern Triumph technology, cleverly hiding it behind that traditional exterior.
We've also retained the air cooling to give you a bike that looks right but, although it seems to have twin carburettors, the Speedmaster is fuelled by a modern electronic fuel injection system for high efficiency, plenty of smooth and accessible power and exceptional fuel consumption.

Configuration

The engine feels great thanks to the 270 degree crankshaft design which results in a lazy, uneven beat from the mellow exhaust note to match the easy pull of the motor. We’ve made sure that vibration levels are just enough to let you know there's an engine working hard beneath you but without intruding on your general ride or comfort.
And, inside the old-style cylinders we’ve added double overhead camshafts, eight valves and a fully integrated crankshaft, clutch and gearbox. All with a comprehensive engine management system to handle the ignition as well as fuel injection.

Fuel Efficiency

The Speedmaster is laid-back and easy on the fuel too. It can manage 71.1mpg at a steady 56mph and even at 75mph you’ll be sipping fuel at 55.5mpg.

ENGINE	
TYPE	Air-cooled, DOHC, parallel-twin, 270º firing interval
CAPACITY	865cc
BORE	90mm
STROKE	68mm
SYSTEM	Multipoint sequential electronic fuel injection with SAI
EXHAUST	Stainless steel twin-walled headers, twin chromed silencers
FINAL DRIVE	X-Ring-Chain
CLUTCH	Wet, Multi-Plate
GEARBOX	5-Speed
OIL CAPACITY	4.5L

CHASSIS

Frame

Holding everything together and keeping it in line is our traditional-style tubular steel cradle frame with steel swingarm, using the engine as an essential component to give you exceptional rigidity for stable, sure-footed handling.

Suspension

The suspension doesn't suffer for the sake of the Speedmaster's style.
We fitted high quality KYB forks and shocks with a generous 120mm travel at the front and 96mm travel at the rear, enough to cope with poor conditioned back-roads as well as maintained highways.
The shocks are preload adjustable too, so you can find the perfect balance and stance whether you're travelling light or fully loaded with a passenger and the accessory luggage.

Handling

Forming the backbone of the Speedmaster's long, low style and at the same time providing it with exceptionally easy, well-balanced handling. We've made a chassis for the most inexperienced riders can manage and seasoned ones can enjoy.
We raked the forks out at an extreme 33.8 degrees in true hot-rod style and kept the trail figure long at 170.4mm. We stretched the wheelbase out too at a lengthy 1606mm but because we've kept the centre of gravity low and very carefully matched the geometry, the Speedmaster still steers with that easy, engaging feel that makes even tight, low speed corners a breeze. And stability at higher speeds of course is exceptionally good.

Brakes

We put a single 310mm disc at the front backed up by the 285mm rear disc to help maintain the bike's lean look, but together they still provide plenty of power with good feedback to make sure the Speedmaster stops as well as it goes.

Riding Position

As a Speedmaster rider you adopt a relaxed position, feet well forward and hands wide apart on the pulled back bars. Sitting just 690mm from the ground the Speedmaster is very easy to manage even at walking pace. And it's comfortable when the pace increases, so you can take in the scenery and just enjoy the ride.
It's laid-back style suits a wide range of riders and is a great choice for anyone that finds other bikes too much of a stretch to the ground.

CHASSIS	
FRAME	Tubular steel cradle
SWINGARM	Twin-sided, tubular steel
FRONT WHEELS	Cast aluminium alloy 5-spoke 19 x 2.5in
REAR WHEELS	Cast aluminium alloy 5 spoke 15 x 4in

Terms and Conditions: Subject to availability. Fitting charges may apply. Offer subject to the purchase of a full price motorcycle. Offer subject to stock availability and is valid between 01.10.2016 and 31.10.2016. Subject to availability. Credit is subject to status and is only available to UK residents aged 18 and over. Tristar Personal Contract Purchase is only available through Triumph Motorcycle Finance, a trading style of Black Horse Ltd, St William House, Tresillian Terrace, Cardiff, CF10 5BH.
The Representative Example figures shown are correct at time of publishing and are based on an annual mileage of 5000.
With TriStar Personal Contract Purchase you have the option at the end of the agreement to:
(1) Return the motorcycle and not pay the Optional Final Repayment. If the motorcycle is in good condition (fair wear and tear accepted) and has not
exceeded the allowed mileage you will have nothing further to pay. If the bike has exceeded the allowed mileage a charge for excess mileage will apply – in this example 6p per mile + VAT for any excess mileage up to 4,999 miles and 12p per mile + VAT for any excess mileage exceeding 4,999 miles.
(2) Pay the Optional Final Repayment to own the motorcycle or
(3) Part exchange the motorcycle subject to settlement of your existing finance agreement; new finance agreements are subject to status.
