Rocket III Roadster (£13,599.00) †

PRODUCT INFORMATION

OVERVIEW

With the world's biggest production motorcycle engine the latest Rocket III Roadster builds on the huge performance of the original Rocket III but now with even more torque.
The 2.3 litre, three-cylinder engine is designed to be an arm-wrenching thrill to ride, yet easy and unintimidating too, despite its thunderous roar. Its sweet handling chassis, rigid frame and sophisticated suspension gives you the confidence to sweep through corners and change direction with an agility that belies this Roadsters size.
The latest Rocket III features blackened components including radiator cowls, rear mudguard rails, airbox cover, fork protectors, and mirrors giving our Roadster an even more menacing look.
There's nothing else like it out there, not to look at, nor to ride.

ENGINE

Performance

The capacity of the Rocket III Roadster is huge, 2,294cc, and with a gut churning 221Nm at just 2,750rpm it has more torque at idle than most superbikes at full chat!
The latest engine is unrestricted thereby delivering its full strength in the first three gears giving it almighty punch.

Configuration

The three big cylinders are arranged lengthways along the bike to keep it manageably narrow and align the crankshaft with the shaft final drive, but to tame the reaction of the massive torque, the crankshaft counter-rotates so the bike stays steady when the throttle's blipped.

Shaft Drive

With a shaft drive that needs no maintenance outside the scheduled service intervals, you have a roadster that's so reliable, durable and engaging that you could even go touring on it.

ENGINE	
TYPE	Liquid-cooled, DOHC, in-line 3-cylinder
CAPACITY	2294cc
BORE	101.6mm
STROKE	94.3mm
SYSTEM	Multipoint sequential electronic fuel injection with twin butterflies and progressive linkage on primary butterflies
EXHAUST	Stainless steel 3 into 1 into 2, large volume catalysts in front of chrome-plated silencers
FINAL DRIVE	Shaft
CLUTCH	Wet, multi-plate
GEARBOX	5-speed
OIL CAPACITY	5.9L

CHASSIS

Frame
We developed the big, tubular steel twin spine design to be strong and rigid enough to contain this powerhouse of a motor. But we focused on giving you an improbable level of agility too.

Suspension
We gave the front end sports-bike-style upside down forks 43mm in diameter so they're strong enough to cope with all the forces a bike like this can deal out, yet with sophisticated internals so you get a plush, controlled ride.

Wheels and Tyres
The rear wheel diameter on the Rocket III is 16 inches to emphasise the fatness of the back tyre but to give you a more agile bike too.

Brakes
A bike like this needs a pair of vice-like, four-piston callipers. Gripping the 320mm discs and backed up by our advanced ABS system and a huge 316mm disc at the rear.

Handling
What our design and testing teams have managed to achieve is a massive bike with genuine handling prowess. Giving you low speed balance and beautifully neutral steering so when you're faced with a twisty road you can be filled with anticipation and confidence.

Riding Position
It's your stance that really separates the ride on a Rocket III Roadster from the Rocket III Touring.
We put the Roadster footrests back to a mid position and the seat forward. Sitting you upright and active for better control. Spacious and comfortable enough to cover distances and cruising, especially with a seat this plush and generously sized.
And, despite the bike's width, it's still slender in the middle so your legs aren't splayed apart uncomfortably. The Rocket III Roadster might be larger than life, but it's still designed to fit.

CHASSIS	
FRAME	Tubular steel, twin spine
SWINGARM	Twin-sided, steel (houses drive shaft)
FRONT WHEELS	Cast aluminium alloy 5 spoke, 17 x 3.5in
REAR WHEELS	Cast aluminium alloy 5 spoke, 16 x 7.5in
FRONT TYRES	150/80 R17
REAR TYRES	240/50 R16
FRONT SUSPENSION	Kayaba 43mm upside down forks, 120mm travel
REAR SUSPENSION	Kayaba black spring twin shocks with 5 position adjustable preload, 105mm rear wheel travel
BRAKES FRONT	Twin 320mm floating discs, Nissin 4-piston fixed calipers, ABS
BRAKES REAR	Single 316mm disc, Brembo 2-piston floating caliper, ABS

COLOUR OPTIONS	
	Matt Phantom Black
	Phantom Black

PERFORMANCE	
MAX POWER EC	148 5750
MAX TORQUE EC	221 2750

ACCESSORIES		DESCRIPTION	PRICE
	Knee Pads (A9718005)	Protects the sides of the fuel tank from everyday knocks and scratches. Add a Tank Pad A9718006 to ensure the fuel tank is fully protected.	**RRP £55.00**
	Passenger Backrest Bar and Luggage Rack - Short (A9738071)	Providing support and comfort to the pillion, the Sissy Bar is a must for two-up touring.
