Thunderbird Commander

(£12,999.00) †

PRODUCT INFORMATION

OVERVIEW

A strong, willing engine, refined chassis, powerful looks and broad riding position give our new Thunderbird Commander the power and presence to dominate any road. Based on our original Thunderbird, the Commander easily impresses riders and onlookers with its classic cruiser style, premium feel and the world's largest capacity parallel twin engine. Being a Triumph, it's a cruiser that also gives you day-long comfort, practicality, character and, on top of all that, superb handling. There's no compromise here.

ENGINE

Overview

This is the largest capacity parallel twin motorcycle engine in the world. Based on the original Thunderbird parallel twin, the beating heart of the new Commander generates an organic, torque-rich riding experience unmatched for sheer grunt and ease-of-use.

Configuration

Being a Triumph, the Thunderbird Commander is packed full of modern engineering. We added double overhead camshafts and a crankshaft with 270 degree firing intervals, to give you an engine with authentic cruiser character.

Whilst the fuelling is looked after by a sequential fuel injection system and progressive throttle linkage so your engine delivers its torque exactly the way you expect.

Performance

Powered by a pair of saucer-sized forged pistons, the 1699cc eight-valve, DOHC engine's uneven 270° firing interval and long-stroke design produces a potent 94PS (93bhp) at 5400rpm and a huge 151Nm (111 lb.ft) of torque at a lowly 3550rpm, giving the Commander bags of twin-cylinder character.

Transmission

Developed and refined by our engineers so that the Commander gives you performance through a seamless, snatch-free transmission.

ENGINE	
TYPE	Liquid-cooled, DOHC, Parallel-twin, 270° firing interval
CAPACITY	1699cc
BORE	107.1mm
STROKE	94.3mm
SYSTEM	Multipoint sequential electronic fuel injection, progressive linkage on throttle
EXHAUST	Chromed twin-skin stainless steel 2 into 2 headers, tandem forward mounted large-volume catalyts, chrome-plated silencers
FINAL DRIVE	Toothed Belt
CLUTCH	Wet, multi-plate
GEARBOX	6-speed constant mesh, helical type 2nd - 6th
OIL CAPACITY	4.2L

CHASSIS

Overview

There's no handling compromise when you choose a Triumph cruiser, and the Thunderbird Commander is no exception. Engineered to be responsive, agile and deceptively easy to turn, even at low speeds, the Commander marries tuned geometry with a low centre of gravity to make it steer as beautifully as it looks.

Frame

A dynamic engine with dynamic styling demands an equally dynamic chassis; one which reflects our belief that every bike, whatever its style, should be agile yet stable, have predictable, neutral steering and superior suspension and brakes. The Thunderbird Commander is no exception to that rule.

Wheels and Tyres

Fat-section 140/75 17-inch front and 200/50 17-inch rear tyres running on diamond-turned cast wheels.

Suspension

The Commander's handling is further enhanced by a chassis specification worthy of sportier bikes. It features shrouded 47mm Showa forks, twin 5-way preload adjustable Showa rear shocks, with optimised dual-rate springs, keeping you isolated from bumps but in touch with the road.

Brakes

Dual four-pot Nissin callipers on 310mm floating discs up front and a single Brembo calliper and 310mm disc at the rear, in conjunction with latest generation Triumph ABS, provide efficient performance and effortless braking control.

Handling

From the moment you roll forward on the Thunderbird Commander, you'll notice that handling control is a priority, not an afterthought. Light, neutral steering belies the width of the tyres, gives the rider form and function in one package. The parallel twin engine's compact weight distribution means the centre of gravity is focused in front and below your knees, giving the Commander a gentle, even tilt into turns.

Footboards

The Thunderbird Commander gives you high quality foot-boards made from chromed high-pressure die-cast aluminium, featuring replaceable skid plates and an adjustable heel/toe gear lever.

Seat

Rider and pillion seat foam is a double-layer, dual-density material, soft and receptive on first feel but compressing to give a firmer, supportive yet pliant ride. The rider's seat has also been especially shaped with wide, flared sides and a lumbar support to provide maximum comfort even at the end of a long day's ride.

Tank

A massive 22 litres fuel tank with off-centre filler cap.

Instruments

Tank-mounted dash console including classic analogue-style speedometer, a fuel gauge and an LCD with range-to-empty, twin trips, odometer and clock functions, conveniently scrollable via a handlebar-mounted button.

Silencer

Twin, straight-cut drainpipe silencers so wherever you ride you'll be accompanied by the Commander's stirring exhaust note, specially tuned for pitch perfect progress.

CHASSIS

FRAME	Tubular Steel, twin spine
SWINGARM	Twin-sided, steel
FRONT WHEELS	Cast aluminium alloy, 5 spoke, 17 x 3.5 inch
REAR WHEELS	Cast aluminium alloy, 5 spoke, 17 x 6.0 inch
